### DEPUTATIONS WAIT UPON TOWN COUNCIL

The regular meeting of the town council was held on Monday night. Deputations were received from the Institute Public Library, the Catholic Church and the Local Union. The first mentioned was represented to Mr. J. E. Gillis and Rev. J. W. Smith, asking for further financial assistance to the library, which had now become well established, but was dependent upon considerably more than could be expected from fines and membership fees. A statement of the financial position of the library was given, also the fact that some eighty or more members were making use of books available. The town council early in the year had granted \$250 towards the library, with the promise of consideration of the library requirements half yearly. A further grant was made of \$250, all councillors and Councillor Morgan voting in favor of the motion.

A delegation from St. Anne's church asked for a water pipeline extension to the centre of the Catholic cemetery, which was also granted.

A delegation from the Miner's Union appeared in the interests of a fellow citizen, asking that he be given work when work was offering. Council agreed to accede to this request.

The tender of L. Pozzi for construction of a cement crossing over Victoria Street, just west of Fifth Avenue and leading to the C.P.R. depot boundary, was accepted, the work to start at once.

A number of accounts were passed for payment.

### ELECTIONS MONDAY NIGHT

Very little interest in the forthcoming federal elections appears to be manifested locally. Even the public meetings so far held have not attracted the attendance desired, so that it is not expected that a very heavy vote will be polled in this year of the riding on Monday next.

Various meetings have been held throughout the riding in the interests of the candidates, G. G. Coote, farmer, and J. D. Matheson, conservative.

Meetings are slated for Bellevue, Hillcrest, Coleman and Blairmore this week end, to be addressed by A. L. Smith, K.C., and J. D. Matheson, K.C. See bills for further particulars.

There was only one nomination in the Hanna district constituency and that candidate was elected by acclamation. Referring to the matter, the Hanna Herald remarks: "It's mighty tough for the newspaper operating in a constituency where they hand out an acclamation. No ballots to print, no proclamations, no political advertising, nothing in the line of election printing or advertising. With times tough, this is tougher. But 'our loss is others' gain.' We should feel that we are party to the reduction of the national debt."

Once more advertising makes a hit. This time, a Miss Armstrong, of Claresholm, touring through Blairmore on Wednesday of last week, had the misfortune to lose a suitcase from the car. The suitcase was picked up and brought to our office, with the request that we endeavor to locate the owner. We had written an advertisement, which was immediately set in type, and just as we were going to press we had word from the owner at Claresholm.

Dr. J. Olivier has secured a practice at Creston and has already moved his hospital and office equipment to that point. Mrs. Olivier and the children will remain here for a while yet.

### FINANCIAL POSITION OF ATHLETIC ASSOCIATION ENCOURAGING

The recent fourth annual field day of the Blairmore Amateur Athletic Association was most successful, both financially and otherwise, as shown by the statements submitted at the well attended meeting held at the Cosmopolitan hotel on Tuesday night. As a result of the day's events, considerable has been added to the bank surplus, and it was decided to appeal to the town council and other local organizations for co-operation towards creating a district sports grounds in Blairmore, which would be second to none in the western provinces. With this object in view, the secretary was instructed to write to the council and other bodies, asking assistance financially. The work of building up and fencing the athletic grounds will involve considerable expenditure, and it is proposed that time be taken so that this money would tend very largely to relieve unemployment and distress in the town at a time when most urgently needed. Provision will be made for a regular 440-yard race track and 100-yard straightaway track, along with ample provision for baseball, football and other popular activities. The grounds will be located immediately south and west of the arena and the site is most admirable. The enclosure will be surrounded by a high board fence.

When the work is completed, application will be made to the Alberta Amateur Athletic Union for provincial championships.

### DEATH OF MRS. McDOWELL

Mary, beloved wife of Samuel McDowell, passed away on Monday, following a prolonged illness, at the age of 44 years.

An impressive funeral service was held at the United Church on Wednesday evening, following which the remains were taken to Calgary, where interment took place this afternoon in the Burnsland cemetery, with Rev. W. T. Young, formerly of Blairmore officiating.

Mrs. McDowell is survived by her husband and three sons.

### INLAND PETE NO. 1" STRIKES OIL FLOW

Inland Petroleum's No. 1 well drilled on the Elliot 40-acre lease on the Montana side of the Red Coule field, but financed in Canada, drilled into production on Monday, according to a statement by Arthur M. Densmore, of Lundbreck, managing director of the company. The well is rated by J. W. Elliott, drilling contractor, as a 225-barrel producer with the sand penetrated only to a depth of six feet. The well may be deepened to increase production.

This well, the first to be put down by Inland Pete, was spudded in June 11 last, so that something of a drilling record was made as production was found on July 22. The well, a direct offset to the Rice-Radigan producer, and a diagonal offset to the Cosmos No. 1 well, drilled into 5,000-foot of gas at 2477 feet. After hurling rocks over the crown block for several hours and giving the crew a real battle, the gas was brought under control and will be marketed in the field, Inland Pete being the only well on the Montana side to save its gas flow. This gas will give the company a good revenue in addition to its oil production.

Messrs. A. M. Morrison, of Coleman and A. M. Densmore, of Lundbreck, were present to see the well drilled in. They are president and managing director, respectively.

Glen H. Curtis, widely known aviation pioneer, died at Buffalo, N.Y., yesterday.

WORLD HAPPENINGS  
BRIEFLY TOLD

Sir Ernest Howard, British ambassador to the United States, who was granted a barony on the recent King's birthday, has taken the title of Baron Howard of Penrith.

Professor Ludwig Stein, internationally known philosopher and author, died at a nursing home at Salzburg, Austria, after an operation. He was 70 years old.

Canadian shipping companies had the bulk of the wheat business on the Great Lakes last month, according to the report of the Lake Shippers' Clearance Association.

The British Government is highly pleased by the shipbuilding holidays agreed to by France and Italy. Premier J. Ramsay MacDonald told a questioner in the House of Commons:

"The financial situation among Chicago's 13,000 public school teachers is once more acute. It is vacation time, play classes are three weeks over. To date, the back pay amounts to \$6,500."

Hundreds of thousands, celebrating 300 years of Massachusetts history, heard Sir Ronald Lindsay, British ambassador, bringing the greetings of the ancient mother state to the sovereign state of Massachusetts.

G. W. Jones, Canadian expert on taxation, has arrived at Canberra, Australia, at the invitation of the government of the commonwealth, to advise the administration regarding the operation of the sales tax introduced in the budget brought down recently.

British unemployment figures still are soaring upward a government report indicated. The Ministry of Labor announced that on July 7, the total out of work was 1,933,500, a gain of 42,925 over the previous week and 789,254 more than the same period last year.

## Canada's Gold Production

Production in Canada Now Larger Than That of U.S.

Canada has certainly been making rapid strides in gold production as compared with the United States, and last year the total production of gold out of Canadian territory was actually larger than taken out of United States. The United States, however, has also reports on production from gold mines in Alaska, and in the Philippine Islands. According to mining engineers it is only a matter of a little time when the gold mines in Canada will be producing considerably in excess of what the United States is producing.

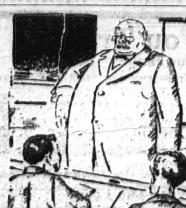

It is for the United States to report a smaller production, whereas many of the principal Canadian properties are gradually reporting a still larger output. Twenty-five years ago it was not thought that Canada would overtake the United States in 100 years, and yet it has been able to achieve it in less than a quarter of a century.

## Made Fortune From Linoleum

Ingenuity Of Englishman Started Him On Read To Wealth

Lord Ashton, whose amazing fortune was between thirty and forty millions, owed his wealth originally to his clever father's ingenuity, says the News of the World. The father was a working man painter, who started a little shop in Lancaster, where he combined with his trade a picture-framing business. When cloth was introduced from America he improved on it by giving it a backing of powdered cork instead of cloth. So linoleum was invented and his fortune made. Lord Ashton himself worked in his father's factory from an early age and proved a wonderful man of business.

A toad gets his meals by snapping his long tongue out at any insect coming within reach. The end of the tongue is sticky, and few are the insects that can escape its grip.

W. N. U. 1847

Will Increase Safety  
In Steel Construction

Electrical Finger "Facts" Strain In Steel When Under Great Pressure

An electrical finger that "feels" the invisible twists and strains in steel under great pressure was described to the American Society of Testing Materials.

The purpose is to increase safety in construction by making under conditions of actual use tests heretofore reserved for research laboratories. The device was described by J. P. Shambarger, of Pittsburgh, who said it was designed by J. G. Ritter of the Westinghouse Electric & Manufacturing Company.

No longer than a human finger, and not much thicker, it bows to the strain of a 10-ton locomotive thunder over. If placed on a curve it will show the side twist of the rail under the locomotive's thrust. It can be laid upon an automobile wheel to detect how nearly bumps come to causing overstrain.

The finger works somewhat like a slide rule, being of two parts, which telescope. This telescoping amounts only to the diameter of a tremor or a vibration, that is, something like one ten-thousandth of an inch. Even so slight a motion slides a piece of iron or from or between two sensitized electrical instruments on the finger.

The "nerves" of the finger then come into play. They are plain wires, which carry the slight electrical disturbances to instruments that amplify them into movements an inch long, that can be calibrated in terms of wear and tear.

## Bright Spots At Port Churchill

Northern Port Now Boasts Of Four Lady Residents

Up on the rocky shore of Hudson Bay, Churchill was once "No Woman's Land." For five years—including the winters—Mrs. A. Gibson, wife of the Church of England minister, has made the new port her home. But this summer Churchill boasts its largest contingent of female residents.

These new lady residents came north on the Muskrat Limited last May. They were: Mrs. S. Martin, wife of the United Church missionary; her daughter, Margaret; and Mrs. Claude Johnson, wife of the divisional engineer of the Canadian National Railways. All three will reside at Churchill until autumn.

Victim of Hay Fever: "I should like a bottle in my bed tonight, Mary."

Mary: "Yes, sir. Irish or Scotch?"

## A Girl Fire Warden

Young Californian Guards Hundreds Of Square Miles Of Forest

Most people start at the bottom of the ladder and work up. A young Californian girl, however, says an article in the Young People's section of the London Daily Mail, has started as high up as she could get, and is doing her exalted job very well.

She is employed as a warden for forest fires up in a veritable eagle's eerie on the very highest points of Black Mountain, almost 8,000 feet above sea-level, in the San Jacinto mountains.

From her little log cabin, raised on stilts to give a clear view over the topmost trees, she looks out over hundreds of square miles of forest, signaling immediately when she sees a suspicious column of smoke by day and flickering flame by night.

An Alsatian dog named Minx is her only companion. Food comes up to her on the back of a mule. For water she has to climb some way down to a point where engineers of the Forestry Service dammed up a spring for her.

She admits that she does not like the thunderstorms, when lightning strikes all around her switch-point, but declares that she seldom goes lonely, for she was born in a cottage in the mountains and has always been accustomed to their picturesque solitude.

## Grain Stocks Decrease

Grain In Store At End Of June Shows Decrease Of Over Three Million Bushels

Returns received as to stocks of grain in store for the week ended June 27, 1930, show a decrease of 3,277,506 bushels, according to a report issued by the Dominion Bureau of Statistics. Stocks for the week were as follows: Wheat, 18,735,712. Oats, 9,027,331. Barley, 22,639,184. Flax, 512,382, and Rye, 8,241,089, a total of 172,155,698 bushels. Decreases are noted in wheat of 2,381,694. Oats, 356,580. Barley, 3,771. Flax, 38,061, and Rye, 387,411 bushels. For the same week last year the amount is stated as 145,820,622 bushels.

## Judging By Actions

A California paper reports: "After the coroner's inquest, he declared he visited his father-in-law, Daniel Roney's house, whereupon his mother-in-law hit him over the nose, drawing first blood, and his father-in-law fired at him twice with a shotgun. The police believe the Roneys objected to the match."

Candy making is one of the least hazardous of the specialized industries, both from accident frequency and severity.

British airplanes now in regular use carry 22 passengers.

## DEBORAH "A LEADER IN A NATIONAL EMERGENCY"

Golden Text: "Say to them that are of a fearful heart, 'Be strong, fear not'."—Isaiah 35:4.

Lesson: Judges 4:15.

Devotional Reading: Psalm 68:4-11.

## Explanations and Comments

The Oppression at the Hand of the Amalekites. 1-3—When the Israelites were oppressed by the Philistines, and for fear of these travellers left the highways for the byways. When they came to a pass, a man, probably at the head of many other peasants similarly armed, Shamgar killed six hundred Philistines. Then came a crew of Jabin, king of Hazor, who defeated the Canaanites, through Sisera, his commander-in-chief, who had twenty years held a military dependency over the country of Canaan. The children of Israel cried unto Jehovah for help, for Jabin had nine hundred chariots, and they lived on the hills and in the woods.

Deborah Summons Barak To the Defense, ver. 4-7.—The name Deborah means "lady" and Mattheus, "the ancient intercessor of the Bible." Deborah, the judge, the fulfilment of her name by her industry, sagacity, and great usefulness to the people, seems to have been her name and sharpness to her enemies. She was a prophetess and the wife of Lapidoth. To quote Matthew Henry: "The name of Deborah being commonly found in the name of a man, some make this name the name of a place: she was 'a woman of Lapidoth'—that is, of Lapidoth, signifying 'lamps.' The rabbi says she had employed herself in making wicks for lamps of the tabernacle, and that she was esteemed to that mean office for God, who afterwards preferred. Or she was a woman of illumination, one who shone like a lamp, as it were, wise." Between Ramah and Bethel, in the hill-country of Ephraim, she was wont to sit under a palm-tree as a woman of the rest, for Jehovah would not let her go to the camp. Deborah was killed by Jael, a woman (verses 17-22), but Deborah's work seems rather to apply to her, for it is rather she than Barak, who would give the credit for this victory.

Barak Requires Deborah's Aid, verses 8, 9.—Barak was not brave, but he was frank, frank and resolute, and ready to go under Deborah's command and follow her. Deborah consented, but added that he would not have the honor of the rest, for Jehovah would not let her go to the camp. Deborah said to Barak, "If you will go with me, I will go to Sisera." Sisera was killed by Jael, a woman (verses 17-22), but Deborah's work seems rather to apply to her, for it is rather she than Barak, who would give the credit for this victory.

Why They Are Flying

Air travellers, during a recent period, were asked why they were flying. Out of 560 passengers, 253 were on business, 146 for the "joy ride," 163 on holidays. One preferred the air, 53 to visit friends, the theatres, etc., 12 on a tour, and only 1 to take part in a sporting event.

The trap door spider covers its nest with a trap door, neatly bevelled to fit the opening, and hinged at one side. The door is made of alternate layers of silk and soil.

An "intelligent" perfume filling apparatus has been devised, which refuses to drop any liquid into a bottle that happens to be imperfect.

## Consume More Meat

Substantial Increase in the Quality  
Of Meat Consumed by the Average Canadian

Reports of the Dominion Department of Agriculture show a substantial increase in the quality of meat consumed by the average Canadian, particularly beef, lamb and mutton. In 1928, the meat market absorbed 646,600,000 lbs., while in 1929 it absorbed 676,000,000 lbs., an increase of 28,000,000 lbs. of beef, or roughly 2 lbs. more per capita. The Canadian market consumed 70,500,000 lbs. of lamb and mutton in 1928, compared with 62,200,000 in 1929, an increase of 8,300,000 lbs., or nearly 1 lb. per capita.

## A Good Definition

Col. "Pat" Shirley, Oklahoma, is a lawyer, a man of business, a merchant and real estate. His definition of an oil operator is: "An oil operator is a man who doesn't know whether he is four feet from \$1,000,000 or 1,000,000 feet from \$4."

A property in Durham, England, is held at the "rent" of three grains of pepper yearly.

## Outdoes King Of Birds

Flock Of Eagle Raiders Were Annihilated By Airplane

After longing for unnumbered centuries to fly with the wings of an eagle, man has at last even outdone the king of birds. A flock of eagles raiding the sheep ranches popularly known as "the valley of the 100,000 sheep" was wiped out by an airplane with a passenger carrying a machine gun. In eight hours the plane had accounted for nine birds which a rancher had been trying to shoot from the ground for a year.

## White Pine Best For Patterns

White pine is used for 90 per cent of the patterns made in North America. The reason for this, are, that white pine, more than any other wood, is easily worked, is of soft texture, is easily painted, and is very durable, and, most important of all, has very little shrinkage, which gives it the power to hold its shape indefinitely after being worked.

Sir Harry Lauder's last annual farewell tour of this country, scheduled for 1931, has this distinction: That he will be seen on it by people still living, who saw him on his first.

## Make Your Windows Pay

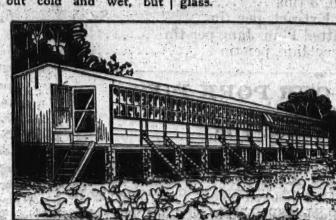

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

NEW SPEED RECORD  
CREATED ON PACIFIC

Creating a new speed record for Pacific Coast vessels, "S. S. Prince Henry," new flagship of the Canadian National fleet, steamed up to Vancouver harbor, having completed her maiden voyage to Skagway and return. Making an average of 20.5 knots between Prince Rupert and Vancouver, she occupied exactly twenty-four hours for the trip. This beats the former record made in 1918 by "S. S. Prince George" by some two hours. A full complement of tourists arrived with the "Prince Henry," including four brides and grooms who spent their honeymoon on board.

FISHERIES DEPARTMENT  
OFFICIALS RECEIVE SCARE

EDMONTON, July 23.—Out of a long list of Dominion services departments, and sub-departments connected with the administration of Alberta's natural resources, it has fallen to the employees of the fisheries branch to receive the first scare in the way of threatened dismissal. But it is only a scare. The fact is that the whole question is still undecided, and meanwhile nobody is going to be let out.

Thirty men employed in administering the fisheries in this province have received advice from Ottawa to the effect that their services with the federal government will terminate July 31, the inference being that the province will take over the work of the department on August 1.

## BOLSHEVISM

On last Tuesday, Pope Pius, in an audience granted to Monsignor Ryan of the Catholic University of America, uttered a solemn warning against bolshevism. His Holiness is thoroughly acquainted with communism throughout the world, and is convinced of the reality of the "red" menace. The stark madness of Russia is finding protagonists in nearly every country and the social and economic conditions obtaining in many countries lend themselves to the dissemination and acceptance of the Marxian doctrines.

Bolshevism results directly from the casting aside by individuals of anything and all that is in the nature of authority. The "Reds" have proclaimed war on all religion, particularly on the Catholic Church. They know that one of the cardinal teachings of true Christianity is submission to authority both in the spiritual and civil spheres. The Church, rendering unto Caesar the things which are Caesar's, upholds law and order, thus becoming the great buttress of the State. The Bolsheviks know full well that he will always find his greatest obstacle in the teachings of Christ which make every true Christian a true citizen.—The Western Catholic.

Miss Joscelyn Peake, of the Royal Bank staff, is away on vacation most of which will be spent at Revelstoke, B.C.

Canada should be like Italy, where there are only two political parties—the dictator and the spectator.

An election for president and secretary of the Bellevue Union resulted in Fred Beal being chosen president, and Leon Leduc secretary.

## STOP! LOOK! LISTEN!

In an English illustrated paper here appeared a picture of a roadside ambulance station with Fire Aid workers in charge, and business nurses in uniform. It was at the corner of one of the busiest roads in the world—the much travelled road to Epsom on Derby Day. Sensing the need, the British health authorities prepared to meet it in the usual effective British manner.

One would wish that every Albertan would take note of the following figures and determine that they will be reduced, and that he and his wife have a hand in helping so to do.

In 1929, seventy-one people in this province met their death in auto accidents, and in the previous year Alberta was the third of all the provinces in the death rate from auto accidents; last year she was in the fifth place. Other accidents in the city of Edmonton took toll of human life as follows: five fatal accidents in 1926, seven in 1927, eight in 1928 and ten in 1929. Going up, in no uncertain measure, every year, until we shall be having the unenviable record of the United States, where the rate was 23 per 100,000 of the population.

Schools and homes and churches must all unite in the efforts to make life supreme value. Children must be protected from their own impetuosity, and taught to take time to consider the grave issues—death itself or a maimed body during life.

One of the interesting feature exhibits at the Red Cross health booth at the Alberta fairs this year, will be a model of a level-crossing accident where the race was not to the swift, and the supreme price was paid. It is well worthy of the attention of every visitor to the fairs, and is entitled "Stop, Look and Listen."

Information on Safety First and First Aid is available free from Head Office, Red Cross, 407 Civic Block, Edmonton.

Many American papers carry crime and golf items on the same page.

The easiest way to become a fluent speaker is to practice by addressing a flat tire.

Up above, we are told, we shall all have Morris. If, however, you prefer a saxophone, you can make your own arrangements.

Miss Milda Bond, who has been training in the Holy Cross Hospital at Calgary, is spending her vacation here with her parents.

A white whale, declared to be rare among the denizens of the sea, was sighted off the Newfoundland bank recently by a coast guard cutter.

George Kafoury, principal of the Nasimine school at Drumheller, arrived here last week end to spend part of his vacation. His sister Mariel is teacher in the same school.

Blairmore Girl—"I don't know how to fill out this question."

Friend—"What is it?"

Girl—"It says 'Who was your mother before she was married?' and I didn't have any mother before she was married."

Every driver of a motor car knows some reasons why his car rides easier than its predecessor of a year or so ago, but he may not have an idea as to how much easier it rides. If the amount of rubber used in motor cars can be taken as a criterion, today's automobiles are three times easier in riding qualities than they were three years ago. Three times as much rubber is used in their construction. Today, the average car contains from forty to sixty pounds of rubber. In 1927, it was four, ten to fifteen pounds. A car contains about 150 pieces of rubber, fitted in here and there, to produce easier riding and less vibration.

Visitor—"So you call your canary Joe? Does that stand for Joseph or Josephine?"

Blairmore Child—"We don't know. That's why we call it Joe."

## Local and General Items

Alex. Cameron and family left by motor last week to spend a few days with friends here during the week. They returned home this morning.

Misses Lucy and Thelma Hinckley of Ferndale, Washington, were visitors with friends here during the week. They returned home this morning.

The little infant son of Mr. and Mrs. Tony Stella died on Monday morning. The remains were laid to rest in the Catholic cemetery yesterday.

Mr. V. A. Bowes, assistant district passenger agent for the C.P.R., was down from Calgary during the week. Mr. Bowes was a recent visitor to Jasper Park Lodge.

The many friends of Mr. B. M. Stitt will be pleased to know that he is the conservative candidate for Lethbridge constituency.

Mr. Stitt is well known in our district and will have the best wishes of a host of Inglewood friends—Inglewood Province.

The marriage of Mr. Sydney White to Miss Agnes Manzies Odell took place at Coleman on Friday evening last.

Following the ceremony, the young couple left by auto for Spokane and other points, and on their return will take up residence at High River.

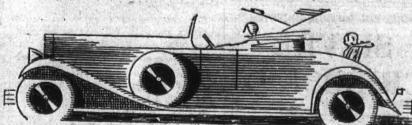

Following is a local school child's essay on "Anatomy." Anatomy is the human body. It is divided into three parts, the head, the chest, and the stummock. The head holds the brain, if there are any. The chest holds the liver and the lites. The stummock holds the entrails and the vowels, which are a e i o u, and sometimes w and y.

years

## Mr. Coote deserves credit for:

Reduction in tariff on motor cars and trucks.

Amendments to the Grain Act.

The appointment of a new Board of Grain Commissioners.

Old Age pensions.

Advocating a National Highway.

He was largely responsible for government assistance for the movement of coal from the Crows' Nest area to Manitoba.

Macleod Federal Constituency Association of U.F.A.

### EXTRACTS FROM ADDRESS DELIVERED IN THE HOUSE OF COMMONS BY G. G. COOTE APRIL 7, 1930.

On April 7, G. G. Coote, M.P. for Macleod, in the House of Commons asked Hon. Chas. Stewart, minister of the interior, if he intended to make an announcement in regard to the application of coal operators of Alberta and eastern British Columbia for a subvention of freight rates or coal from Alberta to Manitoba.

Mr. Stewart was very non-committal, and stated: "I have not yet been able to get the matter before the government for their consideration."

The following address of Mr. Coote in the House of Commons, is taken from Hansard, the official record of debate:

G. G. Coote (Macleod): Mr. Speaker, like many other members, personally I am very tired of this debate and were it not for the fact that there is a great deal of unemployment in my own constituency, I would not take up the time of the house by speaking tonight. I am sure most of us are rather sympathetic with the Minister of Finance (Mr. Dunning), who is anxious to get the house into committee of supply. But in my constituency there are a large number of unemployed men, particularly in the coal mining area. When I was there last December 1, found most of the men were working only one day in the week and occasionally two days. There are five large mines in the district, and I think that statement generally would apply to them all. I find on inquiry from the bureau of statistics that last year—1929—the Hillcrest Collieries worked 192 days; the International Coal and Coke Co. mine at Coleman worked 190 days; the McGillivray Creek Coal & Coke Co. mine worked 210 days; the West Canadian Collieries, Greenhill mine worked 176 days, and at Bellevue 173 days. This means that if a miner worked every day the mine was open at Bellevue he would get 173 days' work in the year. That man must be on hand ready to answer the call of the mine whilst every weekday in the year if he wishes to get in that 173 days' work. Taking all the mines together, they averaged 188 working days in each mine.

This is a very important industry,

the output of this district—and it is practically confined to these five mines—in 1928 was 1,639,000 tons, leaving in mind what I have just said, that one of these mines worked 73 days in the year, I should like to know how many miners earned 1/2 the wages these miners earned. I am quoting from an article entitled "Mining Conditions in Alberta," which appeared in the Canadian Unionist of February, 1930. It is written by Frank Wheatley, vice-president of the All-Canadian Congress of Labor and president of the Mine Workers' Union of Canada. He says:

"Contract miners earn as much as \$8 to \$10 per day, and as little as \$4.40 per day in the organized sections of the coalfield. In the unorganized section, wages are often as low as \$2.50 per day, and these low rates are as inimical to the interests of the coalowners as a whole as they are to the welfare of the miners who receive them. The day-wage scale runs from \$4.20 for outside laborers to \$5.50 for skilled workers, such as carpenters, mechanics, etc. Indoor miners the mine are paid \$4.45; horse drivers \$4.90 to \$5.25; miners, timbermen and track-layers \$5.40 to \$5.57.

Any miner who worked 173 days at \$4.20 per day would earn a total of \$726.60 in the whole year. The frightened paid laborer outside the mine would \$5.50 a day, and if he worked 173 days he would earn \$931.50. This man must hold himself in readiness to work any week in the whole year to earn this amount. Most of these men have families to keep. Personally I do not think anyone in his house would say that any of these miners could possibly keep his family for a year on that amount."

Responsibility on Federal Govt.

I think the Prime Minister (Mr. Mackenzie King) in outlining the policy of the government towards the question of unemployment relief, said that the first duty of providing such relief must fall on the municipalities. I want to show the government how impossible it is for a municipality like Coleman to take care of the unemployed that are there at the present time. In this town 70% of the taxes are levied on the homes of the miners themselves. Now, if the miners are working on the average only 188 days in the year at wages such as I have quoted, how is it possible for

that town to take care of the local unemployment situation? It may be possible for the larger municipalities to take care of a problem such as this, but it is not possible for small municipalities, such as those in these mining districts. In this case, the municipality, I believe, has spent \$1000 in relief work. They gave work for the purpose of assisting these men who were in need of relief. Yet that thousand dollars is only a drop in the bucket to what was really required. The miners themselves have suggested a remedy for the situation as it exists. I may say that over 90% of the coal produced in this bituminous district is taken by the railway companies. In this particular case I think it is practically all taken by the C.P.R. The railway companies take the bulk of their coal during the months of April, May, June and July; sometimes they begin taking it out in the month of March. Because of an immigration policy under which a large number of the miners have come from the old country under the guise of agricultural laborers, the mining companies have been able to put on as many workers as they wished. They work the mines to full capacity and are able to fill the orders of the railway company in four or five months of the year; for the remaining six or seven months the work slackens down to one or two days a week. The suggestion of the miners is that if a conference were arranged between the operators of the mines and the railway company, the railway company might be persuaded to spread their orders over a longer term of months. The miners' union passed a resolution last November dealing with this matter.

This matter has been brought to the attention of the Minister of Labor (Mr. Heenan). I first brought it to his attention last year and received his hearty co-operation. It might fairly be said that due to his efforts the situation at the present time is better than it would have been had he not intervened. At this time I wish to ask the Minister of Labor to go a little further and to try to arrange such a conference as has been suggested. I think that the operators and the C.P.R. should both be represented at this conference, and it is my opinion that the federal government might take the initiative in arranging it. The men who are keeping up these towns and keeping up their schools are what might be called permanent employees of these mining companies. I think in all fairness the work should be confined largely to them, and it could be done without any great inconvenience to the railway company. I ask the Minister of Labor to urge upon the government the necessity for initiating such a conference. May I point out to the Minister of Labor the seriousness of the situation at the present time? Because of the small crop which had to be hauled last year, I understand that this year the railway companies are asking tenders for half a million tons less coal than they took in 1929, and if no action such as is suggested is taken we will have more unemployment than we had last year.

The Minister of the Interior (Mr. Stewart, Edmonton) asked this afternoon for some concrete suggestions. It is my intention to accede to his request, and to put some suggestions before the government. The operators of the bituminous coal mines in Alberta and eastern British Columbia have estimated that 465,000 tons of American bituminous coal are consumed annually in the province of Manitoba; this figure does not include the coal consumed by the railway companies. I am informed that the C.P.R. is using Canadian coal as far east as Kenora, and I make that statement because someone said yesterday that American coal was being used as far as Moose Jaw.

The operators in Alberta are paying a very heavy freight rate on their product to Winnipeg. The rate from Bellevue to Winnipeg is \$5.10 per ton. That is a distance of 841 miles. The cost from Fernie to Win-

nipeg is \$5.30 per ton.

I should like to repeat something I said a moment ago. This year the Canadian Pacific coal requirements will be something over half a million tons less than they were a year ago, and certainly that will cut down employment a good deal. Just here I might quote one sentence from a letter which I received from one of the operators recently. He said:

"You will readily understand that the subvention is absolutely necessary if we are even going to approximate last year's working time and if that fails, there is going to be more distress among the workers than ever."

I should like to mention also, Mr. Speaker, that I have received numerous telegrams and letters from the different localities of the miners' union in that area, all asking that this subvention be granted. I believe the secretary of the operators' association wrote to the minister suggesting that this agreement might be made for a period of three years, which would give the operators time to prove that their coal is just as good as some of the American coal which finds so much favor in the Winnipeg market. The word "Pocahontas," when used in connection with bituminous coal, seems to be like the word "Keen's" when applied to mustard; we know there are other good brands of coal on the market, but if a person can say "this is Pocahontas coal" it seems to sell right away. I believe that if this subvention could be granted for a period of three years Canadian bituminous coal would establish itself in Winnipeg.

Some objection may be taken to this proposal because of the cost it will entail, and I recognize the fact that this matter should be carefully considered on that account. However, I should like to direct attention to the fact that up to the year 1924 the government received \$1,051,000 in royalties from the mines I have mentioned. I do not know what these royalties would amount to since that year, but from rentals, royalties and the sale of certain coal lands, the government received from the companies in that district practically \$1,500,000 up to the year 1924. I am sorry my figures are not up to date.

Then I have one other suggestion to make in regard to the coal industry. I think it will be generally admitted that in no other industry in Canada, taking it over a long period of years, has there been so much unemployment on the average as there has been in the coal industry. I am going to suggest to the government, in addition to the two suggestions I have made already, that they appoint a royal commission to investigate this coal industry. This was done in Great Britain some years ago, and I think it is largely as a result of that action that the present government in the old country have introduced some very drastic changes affecting the coal industry there. The appointment of this commission has been requested by the All-Canadian Congress of Labor and also by the Mine Workers' Union of Canada.

Before I close, Mr. Speaker, I want to assure you that there is real distress among many of our miners. Recently I received a letter which told of the conditions in one town, where the miners were so poor they were not able to pay for their milk. The milkman noticed the mounted police that he was not going to deliver milk to a large number of these families any longer, as he said he must have money for his milk in order to pay for the feed he gave his dairy cows. One cannot blame the milkman, but if the miners are in such dire circumstances that they can not afford to purchase milk for their children, I think this government might very well appoint a royal commission to examine thoroughly into the coal industry and make such recommendations as they may see fit for the improvement of the status of the people engaged in the industry. I think the responsibility in this case is primarily on the Dominion rather than on the provincial governments,

## Vote for J. D. MATHESON, K.C.

The Liberal-Conservative Candidate for Macleod Federal Constituency.

## and for

1. STEADY EMPLOYMENT for Coal Miners by supplying Canadian Coal to Canadian Markets. The fuel policy of the Conservative Party will accomplish this.

2. UNEMPLOYMENT RELIEF by a special session of Parliament to be called immediately after the election by Hon. R. B. BENNETT to pass grants for public works and

3. PROTECTION for the consumer by legislation to prevent Canadian Manufacturers and other protected interests from adding the customs and excise tariffs to the proper selling price of agricultural implements and other goods.

because, as I see the situation in Alberta, the trouble has been caused largely through the unfortunate results of our immigration policy. The majority of the men who consider themselves capable miners are immigrants, and I think a majority of these immigrants came to this country under the guise of agricultural laborers. I think there is no question at all but that the present situation has been brought about largely as a result of our immigration policy. Therefore, I do not feel that I

should make any apology whatever for asking the Dominion government to take the responsibility of dealing with this whole question of relief to the unemployed miners, rather than to ask the province to assume that responsibility. —adv.

Miss Jessie Joyce Collinson, of Hillcrest, nurse-in-training at the Royal Alexandra Hospital, Edmonton, is spending a few days of her vacation with her uncle and aunt, Mr. and Mrs. Ed. Royle, Dearborn Street.

## The Weight Test Shows Gum-Dipped Cords are Stronger-Tougher

HERE is a test which easily proves the value of Gum-Dipping—the extra-potent Firestone process of protecting and insulating every fibre of every cord in a Firestone tire with rubber to eliminate internal heat and friction—the greatest enemy to tire life.

A two-ounce weight is suspended on the end of one strand of a cord (a) taken from an ordinary tire. The strand breaks in 15 seconds. A similar weight is suspended on a Gum-Dipped strand (b) taken from a Firestone tire—it remains unbroken for 45 seconds—three times as long!

Let your nearest Firestone dealer equip your car with a set of stronger, tougher, more dependable tires that hold the world's records for mileage and endurance. See him to-day.

## WOMAN'S PLACE

IN CANADA'S LIFE  
(By Evelyn Robb)

There is one fact about this country of ours which a great many people do not seem to realize and that is, that it is a great country for women, for no country in the world offers better opportunities to women than does Canada. If they do not take advantage of these opportunities it is not the fault of the country or of the government, but of the women themselves. I am beginning to think that the average woman makes a lot of fuss about her rights, fights to get them, and then loses interest in the question. After all, what have women done in Canada? There are a few women doctors, a few lawyers, a few who have fairly good positions in the business world; there is one woman in Parliament and one in the Senate. What kind of a record is that for a country the size of Canada?

You hear it said: "Canadian women are not given the same opportunities as American women are. Across the line women can go into any kind of work and be given an equal chance with the men." That may be true, but the only reason it is true is because Canadian women do not insist in being given that equal chance. The opportunities are here if you will only grasp them. You may have to fight for your rights but all through the history of the world people have had to fight for the things worth having. Women of other countries have gone through the same trials as we are going through in order to gain recognition and have come out on top. Is there any reason why Canadian women cannot do the same?

It has been proven in other countries that women are capable of doing many of the things which, a few years ago only men were supposed to understand. Many women have made names for themselves in the realms of science, law, medicine, politics, business, and in that newest of all professions, aviation. Who are these women who are doing such wonderful things? English and American women for the most part. Not Canadians.

Our country is young and still in the formative period. There is much to be done before Canada will reach its rightful place among the great nations of the world, and the women of the country can play a big part in that work, if only they will. Most of

us have the blood of pioneer women in our veins, which should give us the courage to face any difficulties. Men are never particularly anxious to see women doing the same work as they themselves do, especially if they do it better. That is one of the chief reasons why women in all countries have had to work so hard for recognition in whatever form of work they have undertaken. But, these other women have proved that it can be done, that men can be made to realize that women are capable of doing more than nursing, teaching or raising families.

A lot of Canadian women study medicine, law, architecture and all the various professions which were once supposed to be sacred to men, and when they have their degrees up the idea of practicing because there are too many obstacles to overcome. Others who are in business do the work of a man and are sent to get half the salary a man would be paid for the same work. On the face of it, this isn't fair, and if women would stand up for their rights such conditions would soon cease to exist. Canadian women should realize the significance of the recent decision regarding the admission of women to the Senate that women are "persons," and act accordingly.

England is experimenting with a new type of traffic light, which is said to be much superior to the ordinary light on a pole. The new system calls for a line of electric lamps, buried beneath small glass lenses, flush with the pavement, or inside a glass-topped trough across the road. These lights make an illuminated line across the roadway when traffic is to be stopped. One way in which this system seems an improvement is in stopping the evil and yet common practice of "creeping." Most motorists indulge in this stealing habit, and familiarity with the habitual changes from red to yellow to green gives them a degree of contempt. At any rate, whatever the explanation, the same motorists do not take such liberties with the illuminated stop line; they seem more willing to obey it implicitly. The conclusion is reached that the new system is an advance step in safety measures.

The great problem in a small town is to please the neighbors.

THE PASS FIFTEEN YEARS AGO  
(The Blairmore Enterprise, 1914)

Sept. 4—A very pleasing event took place at the home of Mr. and Mrs. William O. Evans, Dearborn Street, on Tuesday evening, when their eldest daughter, Miss Blodwyn, became the wife of Mr. Owen Morgan. The ceremony was performed by Rev. W. H. Muncester, B.D.

Born at Bellevue, to Mr. and Mrs. Noble McDonald, a daughter.

A son has arrived to Mr. and Mrs. George Coupland at Bellevue. Mother and child are doing well. So is father.

The conclave of cardinals to elect a successor to His Holiness Pope Pius X, was inaugurated at Rome on Monday, attended by fifty-seven cardinals and their conclavists.

D. A. Sinclair has secured the contract for the erection of the temporary tipple for the West Canadian Collieries' Greenhill mine, and work has already commenced.

Sept. 11—J. E. Lussier, of Medicine Hat, formerly of Lethbridge, was instantly killed on Friday afternoon at his home, when a bullet from a gun he was carrying passed through his shoulder in close proximity to the heart.

"Cap" Bennett, one of the world's best known daredevil drivers, was killed at Macleod on September 7th. He was travelling at a mile-a-minute rate.

Miss Helen Boseley has accepted a position as waitress at the Bellevue hotel.

Allan Hamilton has accepted a position as surveyor at the Bellevue mine.

Rev. J. Maclean Beaton, at one time in charge of the Presbyterian work in Blairmore, has been elected moderator of the Calgary presbytery.

It's easy enough to nail a lie, but it's quite another matter to keep it down.

If some Blairmore people should say as they go they would always be travelling backwards.

An American, charged with distilling whiskey, said he did it to distract his thoughts during fits of depression. He was only painting the clouds with moonshine.

## Holidays on Horseback in West

Year by year the idea of Dude Ranching as a holiday recreation that really means relaxation is taking greater hold in the United States and Canada and spreading all over the continent. Horseback riding, trail riding, taking part in rodeos—these are a good enough cow-punching, but anyhow on horseback from morning to night, the way to horseback, from morning and bodies of people, are gone soft in the evaporating life of cities. This totally different kind of a holiday is offered in any of half a dozen Dude Ranches in the Alberta Foothills and the Rockies, where the Kananaskis Ranch, owned by Mrs. "Bill" Brinkley, the T. S. Ranch, operated by Guy Weadick, the

Windermere Girls' Camp and the E. Y. Ranch, recently opened by Miss Emily Yates of Montreal, to mention a few, are the most popular. They are all set in weird and wonderful cowboy outfit from high-heeled boots and chaps to ten-gallon hat and traps out everything—ropeing and tieing calves, packing mules and ponies and learning all the tricks of the trade, including knot-tying, riding the mountain trails, and sleeping out of sight just a real western open-air holiday.

Lay-out shows typical scenes from the Kananaskis-Ranch—Society buds hog-tying a calf; a party of girls in their camp gear all set for a day's outing and a glimpse of the exciting business of erecting a teepee.

## BEWARE! THE WOMAN DRIVER

(By Evelyn Robb)

I heard a man say the other day, "There are only two things that worry me when I am driving a car, cows and women drivers, because you never can tell which way they are going." When a woman driver puts out her hand it means she's either going to the right, to the left, straight ahead or she's going to stop." This is grossly exaggerated, of course, but there is some truth in it.

There are a great many women driving cars who simply don't know what it's all about. They are either so cautious that they hold up traffic and get themselves in all kinds of unnecessary trouble, or else they are absolutely reckless. There are very few women who reach a happy medium. I am not trying to say that all men are good drivers, or even that they are better drivers than women, but most of them seem to have a greater sense of responsibility than women. Before they take a car out they want to know what makes it go, how to fix it if anything happens, and what to do in case of an emergency. Most women drivers, on the contrary seem to have the feeling that these things don't matter, because there will always be some nice man around to help them out if they get in a jam. A short while ago I saw a smart green roadster with a very pretty girl at the wheel stalled in the middle of a busy street. After fiddling with the starter for several minutes she walked across to a nearby taxi stand and asked one of the drivers if he would see what was the matter with her car. He obligingly got into the car and a moment later the engine was running. With a broad grin the man said, "It's always a good idea to turn on the ignition, lady." This girl probably had a driver's license and would have told you that of course she knew how to drive a car.

There are a lot of women drivers who do things like that. You see them out on the highway calmly watching a kind-hearted passerby who is changing a tire for them or perhaps fixing some little thing in the engine which every driver should know how to do. Changing tires is not very pleasant work, anybody will admit, but there's nothing so hard about it. If a woman is capable of driving a car she is certainly capable of changing a tire and it doesn't seem fair for her to sit at the side of the road with a bewildered look on her face until some man comes by and takes pity

on her helplessness. What's more it doesn't sound like what women are trying to kid the world into thinking they are capable, reliable and just as efficient as men.

In the city a lot of women drivers are a regular menace just because they won't take the trouble to obey or even to learn the traffic rules. A woman smiles sweetly at a traffic cop and gets by with almost anything. If some policeman who really takes his job seriously, stops her and explains why she shouldn't be doing what she is doing, she looks insulted and reminds him that she is a lady and isn't used to being spoken to like that. It doesn't seem fair if women are going to do the same things as men that they should use their sex to get them out of troubles they bring on themselves by thoughtlessness and carelessness. Women drivers should know something about the insides of their car, should know and obey the traffic rules and should realize that by disobeying these rules they are not only endangering their own lives but the lives of the other people on the road.

Even when a woman has knocked seven pounds off her weight, you must not refer to her as a lady in reduced circumstances.

It used to be that a fool was a person who didn't know anything, but now a fool is one who knows it all.

Some fish, says a writer, grow at a terrific rate. Especially those that just manage to get away from anglers.

The map sheets of the interprovincial boundary, Alberta and British Columbia, published by the Topographical Survey, Department of the Interior, show the three passes of the Rocky mountains through which railways have been constructed. Crows' Nest Pass has an elevation of 4463 feet; Kicking Horse Pass 5320 feet, and Yellowhead Pass 3711 feet.

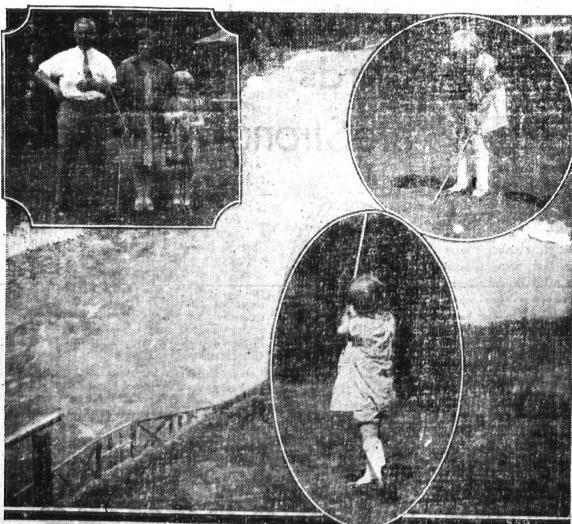

Recently, the president of the Manitoba Wheat Pool was in the act of boasting of the wonderful success attending the efforts of his organization. Speaking of experiments in crossing various grades of grain, grafting of trees, etc., he stated that they had accomplished much through the crossing of a cherry tree with a prune, to which the lady listener replied: "Well, well. Just think of it! And we have read in history of an individual who crossed a desert with a camel and produced nothing."

## Show Them A Mountain And They'll Do The Rest

Edward Feuz (left) holds that "the climbing urge" is a heritage of all white races, be it objective high furniture for an infant, a tip-top for an adult. He ought to know, for he makes his living as a mountain guide in the famous Canadian Rocky Mountains, with headquarters at the Canadian Rockies, near Lake Louise, and has made more "first ascents" to his credit than any other man in the country. His brother Ernst (right) is also an experienced guide and mountain climber, and the natives of Interlaken, Switzerland, and the surrounding mountains in the little Swiss guide village of Edelweiss, in the Columbia Valley. They are shown scanning the peaks adjoining the Banff Springs Hotel.

## Three Generations of Golfers

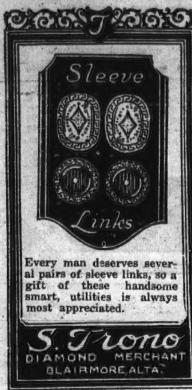

Golfers, like poets, are born, even though, unlike old girls, they are not often born in a single stroke. Lois, a young girl, makes a par four hole in seven strokes, driving a ball across the Spray River, and when her mother, Lois' father, and Lois' grandfather, Mr. Percy Dingley and Mrs. Lois' mother, Mrs. William "Bill" Dingley, were golfing at the Banff Springs Golf Course in 1919, they allowed a little something for heredity. The shopkeeper who told the facts in the case of Lois' father, Lois' mother, and Lois' grandfather at the Banff Springs Golf Course since 1919.

"Start them young" is a good rule in any sport, but is particularly applicable to golf. Lois' mother began her golfing career at six but Lois herself com-

mented at four, when her grandmother purchased a special set of clubs for the baby hands and spent many hours in training, using hours of spontaneously invented methods of teaching. The result is that a child of barely school age is doing what many adults and in fact many golfers cannot do. Lois' father, Lois' mother, and Lois' grandfather, all have putts as beautiful to watch.

Lay-out shows the spectacular drive across the Spray River which features the Banff Springs Golf Course. The three golfing generations: Lois swinging for the drive across the river; and Lois putting true as a die.

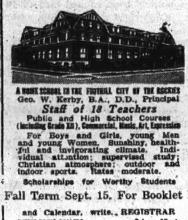

Mrs. Rusicks, mother of Vincent and F. Rusicks, died at Frank on Tuesday. The remains were laid to rest beside those of her late husband in the Blairmore cemetery yesterday. Mrs. Rusicks had reached the age of 87 years.

Every man deserves several pairs of sleeve links, so a gift of them—some smart, utilities is always most appreciated.

### NOTHING ORGANICALLY WRONG, SAYS PRESIDENT CANADIAN NATIONAL

Sir Henry Thornton, president of the Canadian National Railways, who is on his annual trip of inspection in Western Canada, comments on business conditions as follows:

"We can't expect the sun to shine all the time there are bound to be showers. But as many people are mistaking a shower for a cyclone.

"We have got to look below the surface and see if there is anything wrong with our fundamental. If you diagnose the position of the country organically, so to speak, you will find that we have the same courageous and intelligent population we had a year ago.

"That tells us that we have no disease, or as the doctors would diagnose it, we have nothing organically wrong and we are merely passing through a headache or a cold.

"We could not have had the stock market losses of the crash last year in New York, which carried down all the markets in the world, without these losses finding expression in resumed purchasing power of the people in all lines.

"Things will probably mark time for a certain period until the public recovers its purchasing power. If we have a good crop on the Canadian prairies this year we will be well on our way upwards next year."

### HE SMOKED ONCE TOO OFTEN

Smoking around a gasoline filling station is one of the commonest of habits. But it is a habit that the customer will soon break if he has the experience of a motorist who called for gas at a station in Los Angeles. By lighting a cigarette near the gasoline tank, he caused an explosion that damaged the station to the extent of \$11,000. In spite of a strong defense that the proprietor had no ground for action, the Superior Court held the defendant customer responsible.

### LAWYERS LIKE IT

It is interesting to note the make-up of the last parliament of Canada from the standpoint of vocations, as follows:

Barristers	58
Farmers	51
Doctors, Physicians	28
Merchants	24
Manufacturers	12
Journalists, Publishers	10
Notaries Public	8
Lumbermen	6
Druggists	3
Brokers	3
Contractor	1
Dentist	1
All others	39

The eighteenth annual session of the Grand Lodge of the Benevolent and Protective Order of Elks of Canada and Newfoundland will convene at Calgary on Wednesday next.

### COWLEY HAPPENINGS

Mrs. Turner and infant daughter returned to Calgary on Saturday.

Mr. and Mrs. Cecil Easterbrook are rejoicing over the birth of a daughter on July 17th.

Miss Doris McEwen, who is employed as stenographer in the office of George Scougall, Macleod, was a week end visitor with her mother here.

The farm house on the homestead of Gaston Regan, Heath Creek district, was destroyed by fire on Sunday night. The cause of the fire is unknown.

Farmers are rejoicing over a heavy rainfall of 2½ inches, which fell without ceasing for seventeen hours, beginning on Friday night, the 13th, and continuing until late on Saturday afternoon.

Mr. and Mrs. Percy Burles, of North Fork, have returned from a visit with Mr. and Mrs. Pease and family at Creston, B.C. They report a very enjoyable trip. Mr. and Mrs. Pease, who were pioneer residents of this district, moved to Creston some twenty years ago, at which place they have resided ever since and have built up a nice home around them.

Mr. and Mrs. Percy Burles, of North Fork, have returned from a visit with Mr. and Mrs. Pease and family at Creston, B.C. They report a very enjoyable trip. Mr. and Mrs. Pease, who were pioneer residents of this district, moved to Creston some twenty years ago, at which place they have resided ever since and have built up a nice home around them.

The tenth annual conference of the Women's Institutes of the Pincher Creek and Rocky Mountain constituency will be held at Ashdale on August the 14th. Mr. F. C. Acock, district director, of Champion, and Mrs. Montgomery, provincial president, of Wetaskiwin, will be in attendance.

The programme will consist of reports from the standing committees and from the branch institutes. Outstanding addresses will be given by Mrs. Acock and Mrs. Montgomery. Entertainment will consist of community singing, with instrumental selections and readings by child talent. The conference will be conducted by Mrs. Blanchard, constituency convenor, of Burmis. We expect this to be one of the best conferences of its kind ever held in this constituency.

Happy is the wife who believes that her husband is the best man on earth.

### CONFIRMED TITLE AS EARL OF EGMONT

Mr. Justice Eve in chancery division of the supreme court of England has confirmed the claim of Frederick Trevlyan Peverel, former Alberta rancher, to the title and estates of the Earl of Egmont. His Lordship confirmed the decision made four weeks ago by the master of the chancery, P. W. Vandier, who found the claims of Robert Pownall, retired optician and James William Peverel, baker, should be dismissed. Mr. Justice Eve granted a declaration that the "rancher earl" was entitled to the monies in the hands of the trustees, subject to trusts of settlements, and that the trustees should make a vesting charge in favor of Peverel.

The modern generation will stop at nothing but a petrol station.

### AUCTION\* SALE

Houses, cattle, farm implements, furniture, etc. etc.

Mr. M. S. Wilson, I will sell by public auction at his ranch, 18 miles north of Lundbreck, rear the Willow Valley School, on Wednesday, August 6th, commencing at 1:30 p.m., the following:

Cattle—5 good Milch Cows, 1 two-year-old Heifer, 5 calves.

Horses—4 Hackney Geldings, five and six years old and well broke; 2 Mares with foals at foot, 2 three-year-olds, 1 two-year-old Filly, 1 three-year-old Clyde Gelding, 3 four-year-old Plaudmore Geldings, well broke; 1 two-year-old Plaudmore Gelding; 1 two-year-old Plaudmore Filly, 1 three-year-old Plaudmore Gelding.

Farm implements, etc.—Dozer

Mower, McCormack, 10-ft. Rake

(nearly new), Bain Stacker and scythe

Dish Harrow, Disc Harrow, Cockshut, Cultivator, Plow, Scraper, 2

Wood Harness, nice Driving Harness, Single Driving Harness, Bugay, 3 1/2-in. Wagon end box, Hay Rack, Boy's Stock Saddle, Stock Saddle, Saddle, Horse Collars and Leads, Riding Bells, Singing Seats, Singing Machine, High Chair, Cradle, Kitchen Cabinet, Kitchen Range, Kitchen Chair, Cream Separator, Barrels, Churn, 2 eight-gallon Cream Cans, 100 lbs. flour and more, 360 square feet of Lumber, Every kind of Rock and brick, 2 Cattle brands (PH and X), master circle underneath, Horse brand (W with bar underneath), Blanks, and Tools, Old China, Pictures and other articles too numerous to mention.

Also Chevrolet Car, in good running order, 4 Turbine Treadmills, government order, 100 stock, 50

and a 30-30 Rifle. Terms Cash or

Postage, M. S. Wilson, owner, W.

T. Fidd, auctioneer.

### Marketing and Distribution

The problem with which industry is confronted today is marketing, declares Donald M. Marvin, economist, in the monthly letter issued by the Royal Bank of Canada. To quote Mr. Marvin:

"Early economic thought had its birth in a philosophy of trade, but this line of thought was rapidly displaced by theories concerning production. In theory, trading operations became a mere adjunct to productive processes, and, except as regards foreign commerce, occupies a very subordinate place in economic literature. The engineering genius of the world has been focussed on methods of manufacture. The last half century witnessed the growth of large scale production and remarkable improvements in productive efficiency, but relatively speaking, distribution has escaped attention. Today this is changing; the problem with which industry confronts is that of marketing."

While increased attention is being given to the principles and practices of marketing, data relating to this field are far less comprehensive than for other branches of industry. Information on production, prices, export and import, and many other kinds of statistics are available in abundance and in a high degree of excellence. Official statistics relating to agriculture, mining and manufacturing have been collected for many years. The number of persons engaged in these activities is known, together with certain information concerning the quantity and quality of their products. There are no comprehensive statistics of distribution and it is in this field that the need for further information is undoubtedly most acute.

The relative merits of the chain store, department store, mail order house and the local independent dealer have long been the subject of controversy and speculation. The fear that the independent merchant is being crushed to the wall by an over-powering competition has frequently been expressed. What the actual situation may be, not only as regards retail trade as a whole but as regards its different branches, can only be discovered when adequate information concerning distribution is available.

Urgent necessity has moved many private concerns to seek information in this field, but private enterprise has gone about as far as it can go in providing this information. Unfortunately, the results have been incomplete and only serve to emphasize the limitations of a comprehensive statistical study of the subject. The first requisite for such an analysis of distribution is a census of all manufacturing, wholesale and retail establishments which are engaged in distribution. Such a survey will be undertaken by the Dominion Bureau of Statistics in connection with the regular decennial census in 1931. The schedules will contain questions relating to the kind of business, number of employees, salaries and wages paid, inventories, expense of doing business and capital invested.

This census will be of great benefit to all those who wish to make an intelligent study of the problem relating to marketing in Canada. It will supply the basic statistical material required, and provide a comprehensive picture of the various outlets for an extensive list of commodities and groups of commodities. The relative proportion of cash and credit sales will be given. Presentation of the data in the form of averages will furnish a basis with which individual organizations may judge their own results. A picture of consumer demand in each section of the country will be presented, together with information of types of outlets through which many articles are marketed. Such data will be invaluable in the preparation of advertising and sales campaigns. While the advantages of this type of information to manufacturers and distributors is obvious, the fact that the consumer will benefit through the economies which should result, should not be overlooked.

Studies relative to the cost of living will be assisted by data showing the percentages of consumers' purchases of food, clothing, fuel, and other groups of products. Special methods of distribution adapted to certain districts will be shown, and additional light will be thrown on the movement of commodities between the various provinces of Canada. The compilation of these statistics and others of a like character should produce material of substantial benefit to industry and trade.

The success of this survey will depend very largely on the wholehearted co-operation of those who supply the individual returns. The need for the information has become particularly urgent as advances in methods of production have pressed the problems of distribution more and more upon the attention of business leaders. With the added information made available, a real analysis of the problems of distribution will be possible and more effective measures devised for their solution.

### Canadian Destroyer Launched

Destroyer "Saguenay" Is Launched At Southampton, England

The new Canadian destroyer "Saguenay" was launched at Southampton, England, from the Thornycroft yards recently, in the presence of a large and interested crowd. Madame Desbarats, wife of G. J. Desbarats, Canadian Deputy Minister of National Defence, performed the christening ceremony.

A sister vessel, the "Skeena," is to be launched in September. The two destroyers are of special design for use in Canadian waters. They are of 1,330 tons displacement, with a length of 310 feet and a speed of 35 knots.

The "Skeena" and "Saguenay" will replace two destroyers now on loan to Canada for patrol purposes, etc., from the royal navy.

### Where Wives Are Cheap

In the Belgian Congo a pigmy wife of the best breeds can be purchased for a good sharp knife, while others so comely may be had for a pinch of salt. So declared Mrs. Delia J. Akeley, first wife of the late Carl Akeley, on returning to New York from a 10 months' stay in the African jungle.

### NO MORE STOMACH TROUBLE

"No more stomach trouble. Can eat anything, with complete satisfaction. No more heartburn, gas, pain, etc. Heartburn, gas, vanish like magic with Para-San. No more constipation, sick headache, etc. Para-San relieves all these symptoms. Get Para-San" from druggist today.

W. N. U. 1947

### A Vagabond In Canada

Daughter Of British Minister Of Education Enjoys Trip Across Dominions

It's a good idea to be a vagabond for a while in the opinion of Katharine Trevelyan, daughter of Sir Charles Trevelyan, Minister of Education in Great Britain, who left recently for Canada and her home in Canada, Northumberland.

Miss Trevelyan has spent the past two and a half months putting her theory in practice. She has peeled potatoes in cargo boats on the Great Lakes, walked hundreds of miles across the prairies, ventured into the Okanagan and Cariboo districts of British Columbia, and as a final achievement in her adventurous journey across the continent, made a season's first ascent of Mount Edith Cavell, 11,034 feet high.

But out of all her experiences what impresses her the most is that she has still sufficient money left for her next term at Oxford.

"The best about being on one's own," she said just before leaving Jasper Park Lodge for the east, "is that it gives a feeling of independence. It also gives an opportunity for digesting and thinking over the various things you have experienced during the last few years, as well as taking stock of what you see in your journey."

"That is why I think," continued the young English girl on her way back to England to settle down to a period of comparative tranquility, "everyone should get away from his usual routine for a time, at least every four years. In your own comfortable rut at home you don't get a chance to recognize just what has been happening to you."

### Famous German General Dead

General Friedrich von Bernhardi Had Field Command During World War

General Friedrich von Bernhardi, who led the Imperial Army both in victory and defeat, died in Berlin recently at the age of 81.

In the war of 1870, General von Bernhardi was the first German officer to enter Paris after its fall. At the outbreak of the great war he was commander of the home units of the fifth army corps, but at his own request was assigned to a field command and left for the front in December, 1915.

He was an early advocate of the use of asphyxiating gases, and before the end of the war was recognized as one of the premier strategists of the Imperial army.

### Saskatchewan Power

Seven Hundred and Fifty-Eight Miles Of High Tension Lines To Be Built This Year

The Saskatchewan Power Commission is calling for tenders for the building of 758 miles of high tension lines to make available electric energy for the use of some 55 towns and villages throughout the province, so that the lines can be completed and in operation by the end of October, beginning of November.

The power will be supplied by plants located at Saskatoon, Prince Albert and Moose Jaw.

Minard's Liniment checks Colds at once.

### Adding Insult To Injury

The automobile tale Gaston Heriot, of Paris, has to tell is a strange one. Gaston was knocked down by a taxicab, and when he got out of the hospital he was fined for "letting himself be knocked down." The driver proved he had blown his horn, so Gaston had to pay. It's a new law there.

### One Cannot Move Eyes

An owl cannot move its eyes. The eyes of this bird are immovable in their sockets by strong cartilaginous case. To compensate for the inability to move the eyes the bird's neck is so jointed that it can turn its head almost in a complete circle.

### Automobile Insurance Grows

Automobile premiums totalled \$1,900,075. The losses paid were \$1,018,578. More than 140 companies handled in returns. The majority of the returns showed a good margin of profit, but several companies met with unusually heavy losses.

Farmer: "How do you like the goat's milk?"  
City Chap: "Soria tastes of the tin, don't you think?"

Germany's foreign trade continues near the record mark.

**PAINS**  
No matter how severe, you can always have immediate relief:

Aspirin always stops pain quickly. It does without a ray of heat. Harmless to the heart; harmless to any organ. But it always brings relief. Why suffer?

**ASPIRIN**  
TRADE MARK REG.

### Wheat Acreage Less

Decrease In Acreage As Compared With Last Year, Is About 3 Per Cent.

Total estimated areas sown to wheat in Canada for the 1930 season in 24,883,300 acres, as compared with 25,155,000 acres finally reported for 1929 according to the weekly crop report issued by the Dominion Bureau of Statistics. This is a decrease of 671,702 acres, or about 3 per cent.

The area of fall wheat to be harvested is estimated at 836,900 acres as compared with 834,284 acres in 1929, a decrease of 17,684 acres, or 24 per cent.

Spring wheat occupies 23,947,000 acres, as against 24,429,718 acres in 1929, a decrease of 473,718 acres, or about 2 per cent.

Cereal crops show increases, according to the report: oats from 12,474,472 acres to 12,815,000 acres; barley from 5,925,542 acres to 6,050,000 acres; rye from 691,944 acres to 1,092,200 acres. Flax rye occupies 765,400 acres as compared with 664,193 acres in 1929 and spring rye 326,800 acres as against 327,761 acres last year.

Flaxseed shows an acre of 451,500 acres as compared with 382,359 acres in 1929.

The area planted to potatoes is estimated at 557,000 acres, as compared with 549,727 acres, an increase of 2 per cent.

### Icebound Ships Are Freed

Held In Ice Since Last September Are Finally Liberated

The icy embrace of the Arctic Ocean has at last released its grip upon the American fur trading ship "Nanuk" and the Soviet steamer "Stavropol" held icebound in Siberia since last September.

Of the "Nanuk" which freed recently while the packed ice moved off shore while a little later the ice broke up in the bay, freeing the "Stavropol".

It was to the "Nanuk" that Carl Ben Eielson and Earl Boland were flying from Teller, Alaska, last November when their plane crashed near North Cape, killing both of them.

### Recipes For This Week

(By Betty Barclay)

### BOSTON SANDWICHES

Brown lettuce or canned baked beans can be used for a delicious filling for a hearty sandwich. Whole wheat and Boston brown bread are equally desirable.

Fry 1 can baked beans through a coarse sieve and add 1 tablespoon tomato catsup, 1/4 teaspoon onion juice, 1/4 teaspoon mixed mustard and 1/2 teaspoon sugar. Spread on buttered slices of bread and serve with crisp pickle.

### DATE PICNIC SANDWICH

The picnic lunch needs plenty of fruits. A few date sandwiches will do to bolster this up, and furnish very delicious tidbits as well. Run half a cup of dates and half a cup of walnut meats through the food grinder, using the coarse plate. Mix with Philadelphia cream cheese and 1/2 teaspoon sugar. Spread on buttered slices of whole wheat bread.

### PIAZZA DELIGHT

1/2 cup sugar  
2 1/2 cups of water  
2 cups orange juice  
3 tablespoons lemon juice  
Grated rind 1 orange.

Boil sugar, water and orange rind together for 5 minutes. Chill, add fruit juice and serve.

**Wheated From Asthma.** Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can afford to be deprived of the enjoyment of life and health? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does away with the sufferer to normal bodily trim and normal happiness.

### One Thing At A Time

Decided to have worked wonders with many who sought more slender figures. A few cases of famous diets in the public domain, after consulting patients from all parts of Europe. At the doctor's home no one ever is allowed to go hungry. He or she may eat cereals, fruit, vegetables, meat and poultry according to appetite. But what is strictly forbidden is the mixture of foods. It must be one thing at a time. Even butter must go with bread.

### Canada's Forests

The forests of Canada are, in the aggregate, the second most important natural resource, being exceeded in actual value of products by agriculture alone.

### Don't Gamble With Health

We all know health demands above all other claimants. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Sorbo" in a glass of water morning or night, taken up and strengthens the entire system. Acid stomach, fatigue, listlessness, quickly disappear.

### ENO'S "FRUIT SALT"

### British Naval Estimates

Additional Estimates Call For Expenditure Of About \$1,000,000

The British admiralty has published additional estimates for naval construction for the current financial year, in which \$208,200 (about \$1,000,000) is asked. The amount will be used to complete the Leda.

Of the supplementary estimate, \$183,600 is required to meet costs to

submarines this year on three submarines of the 1929 program, construction of which had been deferred pending conclusion of the naval treaty.

The balance of \$24,000 will be devoted to the new construction program for 1930.

### Grain Via New York

Canadian Exports Constituted 20 Per Cent. Of Tonnage Last Year

Canadian grain constitutes 20 per cent. of the export tonnage from the port of New York, according to an estimate outlined in the annual report for 1929, or the Port of New York authority. It was also pointed out that this Canadian grain earned a annual revenue of \$9,000,000 for United States railroads and cargo steamship lines crossing the North Atlantic ports, and furnished from 25 to 75 per cent. of the east-bound cargoes of steamships operating from the port of New York.

**A Power Of Its Own.** Dr. Thomas Edison has a simple power of his own. All who have used it know that and keep it by them as the most valuable implement available. Its uses are innumerable and for many years it has been prized as the leading implement for man and beast.

**W.H. Bull's New Dock**

A \$4,000 dock is being built at Sturgeon Landing, Sask., it was learned following a trip made to the outport by Engineer Davies, representing the Federal Government. Sturgeon Landing is about 135 miles northwest of the Pas, on the Saskatchewan River water route. Much of the freight taken into the north has gone in through this point.

**His Sight Restored**

Blinded In Right Eye, Sight Is Regained In Peculiar Manner.

Totally blind in his right eye for 33 years, Stephen McCormick, of Sydney, Australia, has had his eyesight restored by an accidental finger poke in the eye.

When a piece of stone thrown up by his son's foot robbed him of the sight of his right eye, specialists were baffled.

Thirty-three years later McCormick was exercising with a medicine ball when a companion accidentally poked a finger in his blind eye. He was struck with excruciating pains in the head and suddenly his eyesight returned.

### German Aircraft For Canada

Representative Of The Junkers Aircraft Corporation Visits Dominion

German aircraft builders are well aware of the potential market for machines in Canada, and the Junkers Aircraft Corporation, of Dusseldorf, even anticipates assembling certain of its various types in the Dominion. One of the company's representatives is now in Montreal to investigate the situation and will use one of the Junkers monoplanes for demonstration purposes. It is expected that he will remain several months to discuss conditions and prospects with leaders in aviation.

Coldwater man has a chicken with only one eye, so that part of the world there are a few worms that stand a pedestrian's chance of escaping.

If Mr. Ford is going to save an old-time gentleman for his museum he'll have to be quick about it.

## WHEAT BUYING TO BE TOPIC AT EMPIRE PARLEY

London, Eng.—The Labor Government, through Rt. Hon. Philip Snowden, Chancellor of the Exchequer, has now made it clear that all the British Dominions can hope for at the Imperial Conference next November is a discussion of the possibilities of participating in a system of bulk purchases through an import board.

This system would, for example, enable the Canadian Wheat Pool to sell to the British Government direct, but whether the government would agree to buy if the price of Argentine wheat was lower than the Wheat Pool price is not known, and will not be known until the conference is held.

The conference will take place in the middle of a raging controversy, because all the parties will have eyes on the next British general election, which is not far off now, and unless the visiting premiers are tactful and diplomatic they will find themselves involved.

In spite of Mr. Snowden's declaration, the Laborites are anxious about the outcome of the conference because they realize that if the Dominions make concrete proposals it would be difficult to reject them without giving the Conservatives an opportunity of exploiting such a reaction throughout the country as party propaganda.

### Another War Brewing

**James W. Gerard Sees Conflict Coming Between France and Italy**

New York—James W. Gerard, ambassador to Germany under President Wilson, expressed the belief upon his return from France that "a new war is brewing between Italy and France."

"It is imminent," he said. "It is in the air."

He talked to no diplomats on his visit, he said. Asked if France were the aggressor, he answered: "I should not say so. She has too much to remember of the last war. I think France fears it."

### To Fight Cutworm

**Farmers Preparing To Exterminate Pest Next Year**

Saskatoon, Sask.—Prairie farmers are preparing for the advent next summer of a prominent visitor—the pale western cut worm. K. M. King, of the Dominion Entomological Laboratory, at Saskatoon, urged that an impressive reception be given the insect so well if not favorably known in the west. Trouble from the unwelcome guest will be greater even than the extensive damage of this year unless adequate precautions are taken, advises Mr. King.

### Tax Incomes For Relief

**Australia's Method To Raise Funds For Aid Of Unemployed**

Brisbane, Aus.—A special tax on all incomes to provide funds to extend the present unemployment relief works in Queensland, and an arbitration amendment with a view to establishing the preferred of trades unions, affirming the right of every man to accept work where and when it is offered, are among the government's proposals at the opening of parliament.

### Youthful Traveller

Halifax, N.S.—With a tag on his coat to tell his name and destination, Bazyl Wacko, eight years old, travelling alone from Warsaw, Poland to Star, Alberta, and who arrived in Halifax on the Red Star liner "Westlander," is now on his way west by Canadian National Railways. Bazyl has come to Canada to join his father.

### Manitoba Crop Prospects

Winnipeg, Man.—Manitoba's present crop outlook is described as "very encouraging" in a report issued recently by the provincial department of agriculture. Wheat fields are headed, although heads are not long, and are of a good appearance; how well they will fill depends on the weather, the report adds.

### Run Over By Mowing Machine

Saskatoon, Sask.—Joseph Walker, 65-year-old farmer of Hanley district, was severely injured when run over by a mowing machine. He is now in St. Paul's hospital here, but is expected to recover.

W. N. U. 1947

### Canada's Position Sound

Country Merely Passing Through Temporary Period Of Depression

Victoria, B.C.—Sir Henry Thornton, president of the Canadian National Railways, arrived in Victoria at the end of his trans-Canada survey last and announced his conclusion on the financial condition of the country.

"We can't expect the sun to shine all the time; there are bound to be showers. But so many people are mistaking a shower for a cyclone."

"We have got to look below the surface and see if there is anything wrong with our fundamentals. If you diagnose the position of the country, organically so to speak, you will find that we have the same courageous and intelligent population we had a year ago."

"That tells us that we have no disease, or, as the doctors would diagnose it, we are merely passing through a headache or a cold."

Thornton did not have the stock market news of the crash last year in New York, which carried down all the markets in the world, without there losses finding expression in reduced purchasing power of the people in all lines.

"Things will probably move time for a certain period until the public recovers its purchasing power. If we have a good crop on the Canadian prairies this year we will be well on our way upwards next year."

### Noted Labor Leader Dead

**James M. Lynch Inaugurated Forty-Eight Hour Working Week**

Syracuse, N.Y.—James M. Lynch, former president of the International Typographical Union, died Saturday of that organization's successful battle for the 48-hour working week. Death in hospital here of blood infection.

He was born Jan. 11, 1867, at Manlius, N.Y., and came to Syracuse as a printer's "devil" on the Syracuse Herald.

He stayed with the newspaper until 1888 when he was elected first vice-president of the I.T.U. after holding the presidency of the union for seven terms. In 1901 he was elevated to the I.T.U. presidency, continuing to hold that office until 1914, when he resigned to become Commissioner of Labor.

### Greeting For King George

**Japanese Emperor Sends Message By Prince Takamatsu**

Tokio, Japan.—A greeting from the Emperor of Japan to King George V is on its way to England, enclosed in a golden casket, in the keeping of the Emperor's brother, Prince Takamatsu, who with his bride will be the guest of the King and Queen. The message is in the form of a poem by one of the foremost Japanese poets, and illuminated by Oriental artists. It was formally blessed by the priests at a special religious ceremony in Tokio before it was placed in the casket, and the casket was then sealed to exclude malignant spirits.

### Would Save Millions

**Opposition In Australian Government Ask Reduction Of Members' Salaries**

Canberra, Aus.—A fresh sensation was caused in Australia with an announcement that the opposition is going to move for reduction in salaries the Prime Minister and of the members of the House of Representatives.

Hon. J. G. Latham, leader of the national opposition, gave notice of intention to move an amendment during debate on the budget. His estimate of a saving of \$20,000,000 pounds (nearly \$20,000,000) could be effected.

### Receives Appointment

Toronto, Ont.—Prof. J. C. E. Grant, M.B., C.B.E., F.R.C.S., Edin., newly appointed professor of anatomy, University of Toronto, relinquishes a similar position at the University of Manitoba to succeed Prof. J. B. McMurchy, M.A., Ph.D., LL.D. He was temporary captain of the R.A.M.C. and received the Military Cross for war service.

### Decision Left To Dominions

London, England.—The question of whether the forthcoming Imperial Conference will discuss the problem of women's nationality was put to Rt. Hon. J. H. Thomas in parliament, and he replied the agenda was a matter for agreement between the Dominions. He was not able to give any specificities.

### Was Celebrated Violinist

Dresden, Germany. Leopold Von Auer, a 1909, celebrated violinist and violin instructor, died of pneumonia at the Samaritans Losenwitz near here. He was 55 years old.

## Six Women Candidates In Election Campaign

**One Running In Manitoba and Two In Saskatchewan**

Ottawa, Ont.—Miss Agnes MacPhail may have to look to her laurels when the burly-burly's done and the battle lost or won. For there are twice as many women candidates in the present election campaign as there were in last Ontario has two, including Miss MacPhail; Manitoba, one; Saskatchewan, two; Quebec, one; a total of six against three in the election of 1929 and four in that of 1925. And women too are likely to have more to say in the result.

They are attending meetings. The new system of enumeration has put more of them on the voting lists. Miss MacPhail was the first woman elected to the Federal House, and for three parliaments she has remained in her isolation.

At Ottawa, Miss MacPhail has been persistent in her attacks on what she considers evidence of militarism. At the League of Nations Assembly in September she was substitute delegate with Sir George Foster on the disarmament committee—the first woman to represent Canada at the League.

In the 1926 campaign, Miss MacPhail had the comfortable majority of 1,728, her fight being with a Conservative. Both a Liberal and a Conservative were in the field early in the present campaign but the Liberal did not submit nomination papers. Miss MacPhail has again a straight fight on her hands.

## WINNIPEG PLANS WORK TO ASSIST UNEMPLOYED

Winnipeg, Man.—The cities of Winnipeg and Brandon have proposed to join themselves in an effort to alleviate the unemployment problem under Premier Mackenzie King's dollar-for-dollar scheme. Decision to start at once on the rebuilding of two bridges as relief work for the jobless was reached at a conference of civic officials of the two cities.

Tentatively, it is suggested the Dominion Government, in line with Premier King's promise that the treasury will expand an equal amount with the provinces seeking to relieve unemployment, will ask to pay 50 per cent. of the total expense. The Manitoba Government would be asked to meet 25 per cent. of the cost with the municipalities putting up the remaining 25 per cent.

While the general view of delegates to the municipal conference is that work on the two bridges, entailing an outlay of something more than \$1,000,000, should be started at once, a gigantic collective scheme of public works approximating a cost of \$6,000,000 or \$7,000,000 was considered. An extensive drainage scheme and other bridge construction would form a part of the large scheme.

The delegation was appointed by the conference to discuss with provincial premier John Bracken immediate construction of the two bridges and apportionment of costs.

### Canada's Apple Crop

**Report Shows Decrease In East But Increase In British Columbia**

Ottawa, Ont.—The commercial apple crop of Canada estimated for 1930 is 1,133,380 barrels, as against 3,939,915 barrels in 1929, slightly less than three per cent. under the average commercial production for the five-year period 1925-29.

### Siamese Princes Arrive

Their Serene Highnesses, Prince Aijah, Prince Chirasakl and Prince Prasobri (left to right), nephews of His Supreme Majesty the King of Siam, who reached Vancouver, June 21, aboard the Canadian Pacific liner "Empress of Russia." The two young princes will enter school at Washington, D.C., while their elder cousin, a captain in the Siamese army, will take up temporary residence at the Siamese legation in the United States capital.

### AVIATOR HAS NARROW ESCAPE

Al Cheesman, Antarctic flier, who escaped without scratch when his aeroplane caught fire while flying from Sioux Lookout to The Pas. The pilot brought his machine safely to rest, also avoiding a crash.

### Ban U.S. Unemployed

**Action Is Taken To Prevent Surreptitious Entries**

Vancouver, B.C.—Hon. Ian MacKenzie, recently appointed Minister of Immigration and Colonization, has asked to have his department prevent the surreptitious entry of unemployed United States workers into Canada.

Instructions have been issued in Ottawa, by Deputy Minister W. J. Egan, to border inspectors to keep a sharp lookout for indications of attempted or surreptitious entry into the country. Co-operation of the customs department and mounted police has also been sought, he states in a telegram to Mr. MacKenzie.

Mr. MacKenzie's statement follows: "Having had reason to suspect that unemployed Americans may be surreptitiously trying to make their way into Canada, I wired my deputy minister to exercise the utmost vigilance to see that this does not occur."

"In view of the steps that will be taken in the near future to cope with unemployment in our Canadian cities, particularly in the west, we wish to ensure that the assistance rendered shall be to our own people only."

### Women Peersesses

**Bill To Admit Peersesses To Membership In House Of Lords Is Defeated**

London, England.—A bill to admit women peersesses in their own right to membership in the House of Lords, was defeated by the narrow margin of four votes, 53 to 49.

Lord Astor, who was the mover, had proposed for many years that the right be recognized in the Upper House.

Conservative peers opposing the bill held that the question of the admittance of women should be left until the reform of the whole House was considered, a movement which has been considered for some time.

### Unknown At Ottawa

**Pierre La Passe Did Not Serve With Canadians During War**

Ottawa, Ont.—No man of the name of "Pierre La Passe" ever served in the Princess Patricia's Canadian Light Infantry, officials of the National Defence Department declared here, when asked concerning the man of that name who gave battle to a pair of gulls in Chicago.

There was no Pierre La Passe in any unit of the Canadian Expeditionary Force during the war, the official added.

### Ask Penny Postage

London, England.—Reintroduction of Imperial penny postage, in the interests of Imperial unity, was urged in a resolution passed by the British Empire League. The resolution was proposed by Sir Henry Page Croft.

## Belgium Accepts Invitation

**Will Participate In World's Grain Exhibition and Conference**

Regina, Sask.—According to word received, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference to be held here from July 25 to August 6, 1932.

Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate. A few countries in which cereal production is not carried on, or carried on to a very small extent, have already expressed their interest, to participate, including the United States, Bolivia, Columbia and Chile. The Netherlands and Belgium, eight in all.

Mr. Mooney, the managing director, is now in Europe for the purpose of interviewing government officials and supplying to them detailed information relative to this great Canadian enterprise. His visit is expected to be the means of stimulating a greater interest on the part of European countries. The fact that many countries, two years previous to the holding of the show, have accepted the invitation to participate and send delegates is taken as a good omen for the 1932 show.

**Chiefly because of the fact that over there they blend wheat which they obtain from all over the world and are experts in conditioning and tempering." Not only do the overseas authorities anticipate no difficulty in blending Garnet, but because of its high grade it will enable the use of larger quantities of low grade wheats such as were produced in Canada in 1928. The livelier flour from Garnet is needed to improve the quality of the woolly flour of low grade wheats. It is an improver blends that Garnet will find its greatest value.**

Regarding the relation between Garnet, Marquis and Reward wheats from the grower's standpoint the Dominion cerealist declared that Garnet was not intended to take the place of Marquis, nor was it particularly recommended for growing in districts where Marquis could be safely grown. It was an early maturing wheat and extended the production belt into the early frost areas where Marquis could not safely be grown.

"Too little is known of Reward as yet," he continued, "but he said, 'I observed however that Reward takes a few days longer than Garnet to mature. On virgin soils Reward is one of the highest yielding wheats known, and it is an excellent exhibition wheat, but in other places it is proving a little disappointing from the yield standpoint."

## TWO WARSHIPS SENT TO EGYPT TO QUELL RIOTING

London, England—Great Britain has approximately 9,800 troops stationed in Egypt, Tom Shaw, war secretary, told a questioner in the House of Commons. The troops consist of three cavalry regiments, six batteries of artillery, six infantry battalions and auxiliary troops.

Conservative peers opposing the bill held that the question of the admittance of women should be left until the reform of the whole House was considered, a movement which has been considered for some time.

There was some question among political observers whether the British Government would not intervene in Egypt in view of its obligation to protect foreigners there.

Reports that more foreign troops had been killed in rioting at Alexandria were not confirmed, however, and it was certain the present British Government would not act precipitately.

The British Government has ordered the battleships "Queen Elizabeth" and "Ramillies" to proceed to Alexandria for the protection of foreign lives and property endangered by disorders at that place.

Prime Minister MacDonald, in announcing the dispatch of the vessels, also informed the House of Commons that Sir Sidney Pasha, the present Egyptian premier, and Nahas Pasha, former premier and Nationalist leader, had been warned they would be held responsible for the protection of foreign lives and interests.

### New Form Of Farm Relief

**U.S. Farmers Advised To Use Wheat As Dairy Feed**

East Lansing, Mich.—Agricultural experts at Michigan State College offer a new form of farm relief to those who are worrying about the price of wheat.

Feed to livestock, says a statement issued by four department heads. At present prices, wheat is worth \$6 more a ton as a dairy feed than as a commercial cereal, the experts assert, adding that farmers can save \$10 a ton by feeding wheat instead of corn.

## IMPORTANCE OF GARNET WHEAT DEMONSTRATED

Ottawa, Ont.—Garnet wheat is assured a position of first importance in the supply of Canadian wheat going to European markets. This opinion was expressed by L. H. Newman, dominion cerealist, under whose direction the tests of milling and baking qualities of Garnet wheat were recently conducted in Britain and on the continent.

In a statement issued recently based on his recent report, dealing with the tests, Mr. Newman set forth that "the overseas" tests, arose through the criticism of Canadian millers that flour from Garnet wheat was not as white as the flour of Marquis, and that Garnet being a very hard, vitreous grain, might present some difficulty in the actual milling when mixed with Marquis.

"Examination of the report shows fairly clearly, I think, that these objections do not attain to anything like the same degree in England, or on the continent, that they do here," observed Mr. Newman.

"Chiefly because of the fact that over there they blend wheat which they obtain from all over the world and are experts in conditioning and tempering." Not only do the overseas authorities anticipate no difficulty in blending Garnet, but because of its high grade it will enable the use of larger quantities of low grade wheats such as were produced in Canada in 1928. The livelier flour from Garnet is needed to improve the quality of the woolly flour of low grade wheats. It is an improver blends that Garnet will find its greatest value.

Regarding the relation between Garnet, Marquis and Reward wheats from the grower's standpoint the Dominion cerealist declared that Garnet was not intended to take the place of Marquis, nor was it particularly recommended for growing in districts where Marquis could be safely grown.

"Too little is known of Reward as yet," he said, "but I observed however that Reward takes a few days longer than Garnet to mature. On virgin soils Reward is one of the highest yielding wheats known, and it is an excellent exhibition wheat, but in other places it is proving a little disappointing from the yield standpoint."

### Indians Holding Congress

**Representatives From Canada Will Attend Meeting In Cleveland**

Cleveland, Ohio.—Never before in history have North American Indians of all tribes and nations gathered about one council fire, as they will in this city for five days in September. Prof. Nipu Strongheart, prominent Indian leader and director of American ethnology, who is giving his entire time to plans for the congress, has invited delegations from 40 states, as follows: Oklahoma, 10,000; Arizona, 46,350; New Mexico, 23,000; South Dakota, 20,000; California, 19,000; Washington, 12,900; North Dakota, 10,000. Other states total only a few thousand. Indians of Canada to be represented at the congress will include Blackfeet, Bloods, Pelicans, Cree, Sarce, Sioux, Brantford, and the Mic Mac from Nova Scotia.

### Shipbuilding Declines

**Great Britain's Shipbuilding Industry Shows Up**

London, Eng.—Decline of Great Britain's shipbuilding industry is ratio to that of the rest of the world is revealed strikingly in returns for the second quarter of this year made available by Lloyd's Register of Shipping.

Out of 3,057,000 tons under construction by the world during the three months, 1,392,000 tons or 45 per cent. of the whole was being built in Great Britain and Ireland. This compares with a percentage of 57.2 built by Great Britain and Ireland in the 12 months immediately preceding the war.

**Survived Week In Bush**

Renfrew, Ont.—After wandering through the heavily blazed country in Admaston township for almost a week, subsisting on berries and sleeping under the protecting foliage of trees, Lloyd Warren, aged seven, for whom an intensive search had been maintained, was found. Doctors said he would be quite recovered in a day or two.

**Local and General Items**

Dr. Olivier will conduct an hospital at Creston.

Mr. and Mrs. Max Muts, of Vulcan, were visitors here yesterday.

Miss Jaques, of Calgary, is a holiday guest of her sister, Mrs. R. K. Lillie.

To produce one pound of honey, a bee must take nectar from 62,000 clover blossoms.

An exchange a few days ago remarked: "There shall be wars, and humours of wars."

Starting tomorrow, the little town of Vulcan will entertain Chautauqua for a whole week.

Mrs. Fleming and children are spending part of their vacation in camp at Castle River.

The exterior and interior of the local school buildings are receiving their annual renovation.

The Tw'n City Miners and Bla'more will play on the local baseball diamond tomorrow evening at 5:30.

A Barons girl, Miss Jane Popham, captured the Nellie McClung trophy in the speaking contest at Calgary.

Mrs. Dutil and daughter, Helen, after close on a year residence in Calgary, have returned to Bla'more. J. A. McLeod and family, of Coleman, will make a holiday motor trip to their former home in Nova Scotia.

Mr. and Mrs. McDougall, of Calgary, have been holiday guests for the week with Mr. and Mrs. Hartley Upham.

The attendances at the recent Calgary stampede totalled 202,626, being a decrease of about 20 per cent from last year.

Hundreds have been killed in Italy through an earthquake which occurred yesterday. The injured number upwards of 1500.

Miss Alice Carter, formerly of the Royal Bank staff here, but now of Vancouver, is a visitor with friends in Bla'more.

Judging by the way some fellows tell their fishing stories, there really can't be better fish in the sea than ever was caught.

So many books have been published, telling the truth about the Great War, that ex-soldiers now know what it was really like.

Guess the nationality of the man who kept asking all night long at the King meeting in Calgary: "How about you five-cent piece?"

FOR SALE—Restaurant, the Palm Cafe, at Hillcrest, Alberta. Apply to JOE GEDROITIS, Box 18, Hillcrest. [j 24-31.]

Mr. and Mrs. George White and children returned to Medicine Hat on Monday, after a pleasant holiday visit here with Mr. and Mrs. S. G. Bannan.

D. R. McIvor, former resident of Cowley, has been nominated Liberal candidate for the Camrose federal constituency, opposing W. T. Lucas, U.F.A.

A young lad the other day remarked: "If I ever grow up to be an editor I'll write a red-hot editorial, lambasting the fellow who spits in the waste basket."

The Canadian National steamship "Prince David," on her way to Vancouver from England to enter the service, has left Punta Delgada, in the Azores.

Mr. and Mrs. B. N. Woodhall, of Champion, formerly of Coleman, announced the engagement of their daughter, Gladys Mary, to W. G. G. Laidlaw, of Cardston, the marriage to take place early in August.

Mrs. Rose Callan is a visitor with friends at Bellevue.

A Scotchman gave a penny to a blind man. He needed a pencil.

The Lethbridge exhibition and race meet opens on Tuesday next.

Dr. J. A. Key, of Nordegg, is visiting with his son Gordon at Bellevue.

The first time a Scotchman used his air at the garage he blew out all four tires.

G. A. and Mrs. Passmore paid a visit to their daughters at Cranbrook on Sunday last.

The laying of heavier rails along this section of the C.P.R. is progressing.

Mr. Evan Morgan will leave in a few days to join his family, who are away on a month's vacation.

John Anderson and family are enjoying a holiday motoring through scenic parts of Alberta and British Columbia.

A witness in a police court testified that he had not spoken to his wife for eight years. Well, it is time to interrupt.

The Bla'more Elks' sixth annual carnival opens at the arena tonight and promises to attract the usual large amount of interest.

Saunders reports the hottest day of the year on Sunday last, and that the mercury stood 125 degrees in the sun and 100 in the shade. Let's don't go there!

The business men who are forging ahead today are those who have learned to appreciate and widely utilize the power of printing ink with due discrimination.

As we go to press, we are sorry to learn that Mr. Bozley, better known as "Coke," is seriously ill at his home in Bellevue. His many friends, not only in Bellevue, but the entire Pass, hope for his speedy recovery.

Mr. and Mrs. Bert McKenzie and their daughter, little Miss Dorothy Mae, accompanied by Mrs. P. R. Thibodeau and her daughter, Miss Gladys, of Missoula, Mont., were Piner Creek visitors this week—Piner Creek Echo.

A company known as the "Morrison & Denison, Limited," has been incorporated under the Companies Act of the Province of Alberta as a limited liability company. The head office of the company is situated at Coleman.

Byron Creek Collieries, Limited, a foreign company, has been registered under the Companies Act of the Province of Alberta with head office outside the province at Montreal, and the provincial office at Hillcrest. The authorized capital of the company is \$500,000.

When he reached New York, on his way home to Germany, Karl von der Seison, of the German location at Guatemala City, who passed through Jasper National Park on the Canadian National Railways, a few days ago, will have travelled 11,000 miles, the longest unbroken rail journey in the world. He will have traversed Central America, Mexico, the United States and Canada.

Lounge car with bath and a miniature gymnasium with which the traveller may work out the kinks caused by a day's train journey, with a barber shop for men and women, valet service and an ice cream parlor for the serving of cold drinks to passengers, were added, this week, to "The Confederation" of the Canadian National Railways. Twelve of these cars are in the service on this train which operates daily between Toronto and Vancouver, and these cars will present the ultimate in service for the traveller.
